- International Baccalaureate Diploma Program | Points: 41/45
- *Honors:* J.R. Smith Biology Prize, K5 Biology Student of the Year, Graduated top 9% of IB students globally.

PROJECTS

Your Second Choice - Interactive Story (Episode) **Remote** | Feb 2026 - Present
http://episodeinteractive.com/s/5561537734672384
- Planned and managed production of a multi-episode interactive story from concept to playable build, setting milestones for writing, scripting, art, and testing across 50 episodes.
- Designed branching choice systems with consequences that carry across episodes, scripting scenes with custom overlays, background art, and animation sequencing.
- Ran 100+ rounds of playtests with 10 testers, logging feedback and bugs, prioritizing fixes, and iterating on pacing and choices before each release.

Sprinkle Saver Game (Charity: Water Mission) **Remote** | Jun 2025 - Aug 2025
https://emaa99.github.io/Sprinkle-Saver-finalgame/
- Took a browser arcade platformer from concept to launch: defined the core gameplay loop, wireframes levels and UI, built game logic in JavaScript, and tested before release.
- Animated sprites and designed event-driven feedback via HTML5 and modular CSS, iterating on difficulty and controls based on playtester feedback. .

Intel Sustainability Journey - Global Career Accelerator **Remote** | Jun 2025 - Aug 2025
https://emaantovska.github.io/03-prj-intel-localization/
- Developed a responsive timeline website integrating graphics showcasing Intel's sustainability milestones.
- Engineered horizontal-to-vertical timeline layouts to ensure cross-browser compatibility and accessibility standards through DevTools testing, and implemented interactive milestone cards for user interactivity.

L'Oréal Routine Builder Chatbot - Global Career Accelerator **Remote** | Jun 2025 - Aug 2025
https://emaant44.github.io/09-prj-loreal-routine-builder/
- Developed a product-browser and AI routine builder app using secure OpenAI API communication.
- Engineered routine generation and follow-up Q&A by integrating AI backend with specific prompt control, and added advanced features like dynamic product search and RTL language for international accessibility.

NASA API - Space Explorer - Global Career Accelerator **Remote** | Jun 2025 - Aug 2025
https://emaa99.github.io/07-nasa-space-explorer/
- Engineered a single-page application to fetch and visualize real-time NASA APOD images, handling gallery population, modal views, and API key security.

EXPERIENCE

Black Flow Realty **New York, NY** | Sep 2026 - Present
Consultant
- Testing new features of a consciousness-computer interface headset combining augmented reality, neural signals, and dream data, documenting issues and user feedback to inform the product roadmap.
- Coordinating workstreams and deliverables across a 20-person team, managing timelines and findings.

PwC Macedonia **Skopje, North Macedonia** | June 2026 - Aug 2026
Tax Intern - Transfer Pricing
- Assisted in preparing transfer pricing benchmarking studies, analyzing comparable companies through research on industry and economic trends and market data to support the arm's length pricing policies.
- Supported transfer pricing audits and documentation reviews, collaborating with senior consultants on helping ensure client positions are technically sound and compliant with local and international regulations.

Autoview **New York, NY** | Jan 2025 - May 2025
Strategy Analyst
- Defined funnel/retention metrics (activation, time-to-first-trade, churn, feature adoption) to quantify ROI across onboarding, education, and automation over a multi-month lifecycle.
